

## CALL FOR TUTORIALS

### The 25th IEEE/ACM International Conference on AUTOMATED SOFTWARE ENGINEERING (ASE 2010) September 20-24, 2010, Antwerp, Belgium

<http://soft.vub.ac.be/ase2010>

Software engineering is concerned with the analysis, design, implementation, testing, and maintenance of large software systems. Automated software engineering focuses on how to automate or partially automate these tasks to achieve significant improvements in quality and productivity. Tutorials should either provide an intensive introduction to an evolving or emerging research topic, or allow attendees to develop skill in the application of some ASE technique or tool.

ASE 2010 invites proposals for half-day/full-day tutorials that address theoretical foundations, practical techniques, software tools, and applications related to any of the ASE topics.

The tutorials are scheduled for September 20 and 21, 2010, at the beginning of the conference. Survey papers and or tutorial notes will be made available to the attendees at the conference. Tutorials are intended to provide independent instruction on a relevant theme; therefore, no commercial or sales-oriented proposals will be accepted.

Instructors are invited to submit their proposals and, upon selection, are required to provide tutorial notes or a survey paper on the topic of presentation in PDF. Proposals, also in PDF, should be sent to both Tutorials Co-Chairs. Please include the following information in the proposal that should not exceed 5 pages:

- name and affiliation of the proposer/organizer (including postal address, phone number, fax number, e-mail address)
- name and affiliation of each additional instructor
- instructors' experience in the area, including other tutorials, courses etc.
- title
- objective
- abstract
- duration
- outline with approximate timings
- target audience, including indication of level (novice, intermediate, expert)
- assumed background of attendees
- brief biography of each instructor (for inclusion in publicity materials)
- indication of whether a survey paper will be provided (max. 30 ACM-formatted pages)
- audio-visual and technical requirements
- references including the proposer's papers on the subject

### Review Process

Evaluation of proposals will be based on the relevance of the subject matter to the themes and topics of the ASE conference and on the expertise and experience of the proposed instructor(s).

#### IMPORTANT DATES

Submission deadline: April 15h, 2010  
Decision notification : May 26th, 2010  
Tutorials: September 20th and 21th, 2010

#### TUTORIAL CO-CHAIRS

<b>Thierry Massart</b> Université Libre de Bruxelles Brussels (Belgium) tmassart@ulb.ac.be	<b>John Penix</b> Google, Inc. Mountain View, CA (USA) jpenix@google.com
